EDUCATION

BACHELOR'S DEGREE IN INFORMATION TECHNOLOGY

Kelantan Malaysia University
(UMK Pengkalan Chepa)
2023 – 2026 CGPA: 3.64

DIPLOMA IN DATABASE MANAGEMENT & WEB DEVELOPMENT SYSTEM

Sepang Vocational College
2017 – 2020 CGPA: 3.81

SKILLS

- Programming & Development: PHP, Javascript, Python, HTML & CSS, Bootstrap, Node.js, React.js
- Database tools: MYSQL, XAMPP, Firebase & Firestore, VSCode, Github, Sublime
- Technical Skills: Web Development, API Integration, Data Visualization
- Data & AI: NLP, Data Analyst, Machine Learning, AI Integration
- Languages spoken: Malay (Fluent), English (Intermediate)

CAREER SUMMARY

Motivated Information Technology (Data Science) student with a strong interest in building smart, practical, and data-driven digital solutions. Experienced in software development, data analysis, system support, ESG web systems, dashboards, and AI-assisted applications. Skilled in PHP, JavaScript, Python, SQL, Firebase, and modern web technologies. Known as a fast learner, problem solver, and adaptable team player, seeking an internship in software development.

WORK EXPERIENCE

SYSTEM OFFICER

2021 – MAY 2026

Kennwu Manufacturing Sdn Bhd

Responsible for maintaining company systems, providing technical support, and improving operational efficiency through system management and web development.

- Managed and maintained computer systems, software, and network infrastructure to ensure smooth daily operations.
- Developed and maintained internal web systems using PHP, SQL, HTML, CSS, and JavaScript.
- Provided technical troubleshooting and user support, improving system reliability and productivity.
- Prepared monthly QC reports, inventory reviews, and technical documentation for operational tracking.

PROJECT EXPERIENCE

SocioTrack (ESG Web App) | Final Year Project

- Developed **SocioTrack**, a web-based ESG monitoring system focused on the Social (S) pillar.
- Integrated AI-assisted features, including severity analysis, smart task prioritization, and chatbot support.
- Built the system using React, Tailwind CSS, Node.js, Firebase, and AI integration.
- Designed centralized data tracking and reporting modules for employee wellbeing, attendance, complaints, safety incidents, feedback, and training records.

GreenStream IoT Monitoring System | Capstone Project

- Developed an IoT-based water monitoring system with real-time sensor integration.
- Designed a responsive dashboard for data visualization and monitoring.
- Integrated ESP32, sensors, and web technologies for environmental data collection.

Fertility Risk Prediction Analysis | Data Mining Project

- Developed a machine learning project to analyze fertility risk using socioeconomic data.
- Applied KNN, Decision Tree, regression, and clustering techniques for prediction analysis.
- Performed data preprocessing, visualization, and correlation analysis using Python.
- Generated data-driven insights to support analytical decision-making

ACHIEVEMENT/CERTIFICATION

- Awarded Second Place in the ACEEU Resilient Ventures Hackathon for presenting an ESG-focused innovation solution
- Malaysia Skills Certificate (Level 3) in Application Development
- ISO 9001:2015, ISO 14001:2015 & IATF 16949:2016 Awareness
- Artificial Intelligence (AI) & Data Science Seminar
- MOHE AI Roadshow (NotebookLM)
- Dean's List Award (Semester 1, 2, 4 & 5)
